Description

The Holtkötter Nova Oog floor lamp has a rotating lamp head. This head consists of two parts: While the outer part always emits its light upwards, the inner part can be swivelled. This means that this lamp can radiate light only upwards, upwards as well as downwards or upwards and to the side. The two parts of the lamp head can be switched and dimmed separately via two push button dimmers on the lamp rod. A memory function saves the last selected brightness level of the light and sets it again when it is switched on again. The integrated LEDs have a colour temperature of 2,700 Kelvin extra warm white and can be replaced as required. The floor lamp Nova Oog by Holtkötter is available in white, bronze, matt aluminum, black, platinum and anodised brass.
